

U-TECH

REINFORCED BODY SECURITY CYLINDER

HARDWARE SYSTEMS FOR WINDOWS AND DOORS

A collection of various tools including wrenches, sockets, and screwdrivers, arranged in a dark, dramatic lighting. The tools are scattered across the frame, with some in sharp focus and others blurred in the background. The lighting is low-key, creating strong highlights and deep shadows, emphasizing the metallic textures and shapes of the tools.

U-Tech, don't even try...

U-Tech wins, strongly!

Friction joint and bit to open the door from the outside even when the key is inserted on the inside.

Euro profile security cylinder with flat reversible key, compatible with tear-proof protection rim guard.

Drill-proof pins in tempered steel.

Drill-proof pistons and counter-pistons in tempered steel.

Tear-proof projecting bit.

Ergonomic handle thanks to the polyethylene cover.

Drill-proof pins in tempered steel.

Stainless steel reinforcement bar. It obstructs the extraction of the cylinder in case of attempted burglary.

U-Tech wins in intelligence.

U-Tech is available in the following versions:

- key- key double function
- knob-key
- half-key

U-Tech pack contains the five keys and the card for duplication in a specially provided sealed bag.

The duplication card has a double code:

- Key code, the one stamped on the key neck.
- Duplication code, which guarantees quality Duplication at AGB's partners.

Building Site "PASS" Key (on demand)

The building site key is deactivated automatically the first time one of the owners' key is used.

U-Tech is compatible with AGB's protection burglar-proof devices TENAX.

The key can be customized with a series of interchangeable covers in different colours.

System coding

U-Tech can be configured to obtain special coding systems, such as:

- **GMK general master key system**
- **MK master key system**
- **CC central cylinder system**
