

# AXIS 13 Hardware for wood

A new range of hardware for high performance windows and doors

A complete assortment of components to produce various types of windows and doors on axis 13: entrance doors, balcony doors, tilt&turn rectangular, arched and oblique windows, antiburglar window, tilt&slide windows.

## AXIS 13 Hardware for wood - A new range of hardware for high performance windows and doors

The accessories for axis 13 allow to produce wooden windows and doors with considerably thick profiles (up to 92 mm).

They are designed to offer the maximum acoustic and thermal insulation as well as the maximum mechanical resistance in order to reach high standards in terms of security against break-in attempts, of success with the environmental tests for CE mark, and reliability.

### More security

The axis of the hardware groove is positioned on the centre of the sash profile, in the point of maximum resistance.

### Strength & style

The strikers with 24 mm foot, have a special shape and structure that grant them elegance and solidity.

- **More burglar-proof**

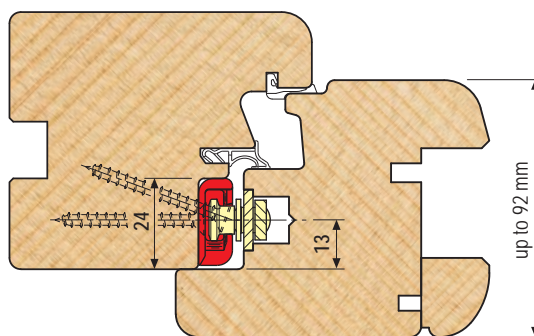

The inclination of the fastening screws make the strikers firmly anchored to the frame.

- **Remarkable mechanical resistance**

The structure of the strikers guarantees long lasting and reliability.

- **Performance improvement**

In consideration of environmental tests for CE mark.

Components available in Silver and Bichromated finishes.
